

RECOMMENDATIONS ON HOW TO CHOOSE A ROOFING CONTRACTOR AFTER A HAIL STORM

1. Have patience and wait for a reputable roofing company to hire. In most cases, if your roof is not leaking, your roof is not going to leak within the next 6 months.
2. Ask to see a roofing company's proof of insurance and city contractor license.
3. Before work begins, there should be a city issued building permit on the job site and posted on the front door or window.
4. City inspections are done to protect homeowners from faulty workmanship and shortcuts.
5. Check references for roofing companies and request to see the scheduled timeline for completing the roofing work.
